Imagine – Zero industrial waste … !

Rent a VacuDry®

Rental or joint operations of VacuDry® unit worldwide

Rent a VacuDry® is econ industries new programme for renting and operating VacuDry® units worldwide.

For more than 10 years econ industries designs and delivers custom made, turn-key vacuum distillation plants, called VacuDry®. These units are used for treating hazardous industrial waste and contaminated soil in the most cost effective and environmental friendly manner. To meet the requirements of our customers and to share the operational responsibility econ decided to lay the foundations for long lasting partnerships covering all project phases, starting a rental and operating service for VacuDry®. As a result, a wide range of services is available covering the whole scope from machinery rental to an all encompassing package. In case of the later econ industries takes care of the whole operation and maintenance of the VacuDry® units together with econ industries local partners. Contact us and we will find a tailor-made solution for your individual needs.
